

EQACC SOLAR

Ultra-high efficiency mobile energy storage containers used in wastewater treatment plants in Seychelles

GRADE A BATTERY

LiFepo4 battery will not burn when overchargedover discharged, overcurrent or short circuitand canwithstand high temperatures without decomposition.

Overview

What are mobile wastewater treatment technologies?

Mobile wastewater treatment technologies have emerged as a versatile solution to address various limitations associated with traditional, stationary treatment plants. These innovative systems offer flexibility, efficiency, and quick deployment, making them indispensable in both emergency situations and planned applications.

What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.

What is intelligent integrated waste water treatment container?

Based on AAO-MBR technology, our patented intelligent integrated waste water treatment container is a new type of waste water treatment container with high-throughput plate microfiltration membrane as the core component.

Ultra-high efficiency mobile energy storage containers used in waste

Integrated Energy Flexibility Management at ...

On-site batteries, low-pressure biogas storage, and wastewater storage could position wastewater resource recovery facilities ...
