# Uninterruptible Power Supply for Somaliland

## Overview

---

What is the power master plan for the government of Somaliland?

The main objective of the Power Master Plan for the Government of Somaliland (GoSL) is to produce a roadmap to guide the introduction and establishment of affordable, safe, reliable, and environmentally friendly electricity supply systems in the country.”.

Can Somalia achieve universal electricity access by 2030?

The 2021 Least Cost Geospatial Electrification analysis outlines different scenarios for achieving universal electricity access by 2030 in Somalia using an integrated approach to technology deployment, encompassing grid, minigrid, and solar home systems (SHS) solutions.

Why does Somalia have a poor electricity supply industry?

First, the electricity supply industry in Somalia is dominated by private players with poor safety records. Second, the government does not own generation assets and has small leverage and low capacity to oversee the Environmental risks of the project.

What is the Somali power project?

The project will reestablish the mandate of public institutions in the power sector and the provision of public financing to ensure equitable and more reliable and affordable access to electricity services for the Somali population.
