# **Uninterruptible power supply and waterproofing solution for base station room**

## Overview

---

Can a remote base station power supply be uninterrupted?

By Zhang Hongguan & Zhang Yufeng Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed.

What is an uninterruptible power supply?

Uninterruptible power supplies provide power to critical loads in the event of a power failure. Unlike emergency generators, UPS systems provide power immediately, but only for a short period of a few minutes – until a backup power supply comes online or until the load completes its shutdown sequence.

Are battery-backed uninterruptable power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptable power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

Do uninterruptible power supplies need protection?

Yes, uninterruptible power supplies must work when needed. Even in the most challenging of conditions, robust protection of the PCB and electrical components will help safeguard UPS functionality. LOCTITE® and TECHNOMELT® brand circuit board protection materials deliver critical defense again

## Uninterruptible power supply and waterproofing solution for base stations

### Liebert® UPS Systems , Vertiv(TM) Uninterruptible Power Supplies

Uninterruptible Power Supplies (UPS)  
These cookies are essential to ensure the correct functioning of the website, to allow you to register/login and access reserved features, and to ...
