

Uninterruptible power supply costs in Nicaragua

Overview

Nicaragua has one of the lowest electrification rates in Central America, approximately 65% of the population compared to 99.2% coverage in Costa Rica. About 68% of the rural population still lack.

What happened to the power sector in Nicaragua?

Go To Top Nicaragua's power sector underwent a deep restructuring during 1998-99, when the generation, transmission and distribution divisions of the state-owned Empresa Nicaraguense de Electricidad (ENEL) were unbundled, and the privatization of the generation and distribution activities allowed.

What is the national energy policy of Nicaragua?

Further electrification of end-uses, especially transportation, in conjunction with the decarbonisation of electricity generation, is an important pillar of clean energy transitions. The National Energy Policy of Nicaragua establishes a policy framework for the development and exploitation of renewable sources.

Why is infrastructure important in Nicaragua?

The Nicaraguan government considers the improvement of the infrastructure especially of energy service a key factor for economic growth and for the alleviation of poverty in rural areas.

How many MW generators are there in Nicaragua?

To address this crisis, the Government of Nicaragua decided to install 60 MW with diesel generators, in 2008 60 Mw with bunker generators, and between 2009 and 2010, 120 MW with bunker generators . All of those operated with fuel which is sold by the Government of Venezuela at subsidized prices.
