# Uninterruptible power supply for Thimphu data center

## Overview

---

What is a Mitsubishi Electric uninterruptible power supply?

Mitsubishi Electric Uninterruptible Power Supplies are designed to protect and secure customer data 24/7/365. Uninterruptible power supply systems are a core component of mission-critical data center infrastructures. At Mitsubishi Electric, we understand the risks associated with downtime in data centers – both to your finances and your reputation.

What is an Uninterruptible Power Supply (UPS)?

An Uninterruptible Power Supply (UPS) is an electrical apparatus designed to furnish emergency power even when other sources of input power fail. They are indispensable tools within a huge range of unrelated industries.

What is a three-phase online modular uninterruptible power supply system?

A three-phase online modular uninterruptible power supply system is a system from the Modulon UPS family that offers scalability and redundancy in a single frame, with a capacity of up to 480 kVA. Delta's UPSs are renowned for their innovation, reliability, and efficiency.

Why do data centers need a scalable UPS system?

Any fluctuation in performance can have a large impact on a data center provider, which is why we've created efficient, scalable UPS systems for data centers designed to deliver the right amount of power within milliseconds of power loss. Modular Application of Mitsubishi Electric's 9900D UPS
