Overview

What is Uruguay's energy strategy?

In 2005, Uruguay initiated a dramatic shift in its energy strategy, moving from petroleum-based electricity generation to renewable sources. In 2024, Uruguay generated 99 percent of its electricity from renewable sources using hydropower (42 percent), wind (28 percent), and biomass (26 percent).

How much solar energy does Uruguay get?

Uruguay receives an average 1,700 KW per square meter of sunlight a year, on par with Mediterranean countries although solar represents only a fraction of the country's total electricity production. Uruguay's Investment Promotion Law offers incentives for investing in solar manufacturing, systems implementation, and solar energy utilization.

How much energy does Uruguay produce in 2024?

According to preliminary 2024 data from Uruguay's Ministry of Industry, Energy and Mining (MIEM), national energy production reached 17,202 GWh, marking a rebound from the downward trend observed in 2023. Of the total production, 15,175.8 GWh was used to meet domestic demand, while 2,026.2 GWh was exported.

What is the oil and gas industry like in Uruguay?

Uruguay's oil and gas sector is relatively underdeveloped, as the country does not produce hydrocarbons domestically and relies entirely on imports to meet its fossil fuel needs. State-owned ANCAP (Administración Nacional de Combustibles, Alcohol y Portland) oversees the sector, managing imports, refining, storage, and distribution of fuels.
