# **Vatican solar Energy Storage Power Station**

## Overview

---

Is Vatican City powered by solar?

This is not just about rooftop panels; it's about how science, sustainability, and faith can coexist and set the pace for the rest of the world to follow. Vatican City is powered by solar. On , the Vatican City officially transitioned to solar power, marking a significant shift in the European energy landscape.

Why did Acea install a solar energy system in Vatican City?

This project was carried out by ACEA, an Italian utility company, which installed systems to meet all of the Vatican's energy demands. What makes this significant is not the size, but that Vatican City is only 0.49km<sup>2</sup>, and there was no loud campaign, no press tour, just action set in stone and implemented.

Why does the Vatican have a solar system?

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an agrivoltaic solar plant to supply the Vatican with energy from Santa Maria di Galeria. On the same site, the new solar infrastructure now stands.

How will the Vatican's new energy system work?

According to the Vatican's press office, the installation will apply the most advanced solutions currently available, balancing clean energy generation with the preservation of agricultural use, the region's hydrogeological stability, and the protection of its cultural and archaeological heritage (ZENIT News / Rome, 08.01.2025).-

-  Efficient Higher Revenue
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 120W Peak Output Power
  - 2 MPPT Trackers, 120W DC Input Overvoltage
  - Max. PV Input Current 15A, Compatible with High-Power Modules
-  Intelligent Simple O&M
  - IP65 Protection Degree support outdoor installation
  - Smart I- Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - DC & AC Type I & SPO: prevent lightning damage
  - Battery Reverse Connection Protection
-  Flexible Abundant Configuration
  - Plug & Play, EPS Switching Under 10ms
  - Compatible with Lead-acid and Lithium Batteries
  - Max. 6 Units Inverters Parallel
  - AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
