

EQACC SOLAR

Warranty for High-Temperature Resistant Folding Containers Used in Urban Lighting

Overview

What is a Feurer insulated container?

FEURER insulated containers offer the ideal solution for the transportation and storage of temperature-sensitive products. Whether food, medical products or sensitive goods – our insulated containers ensure reliable temperature maintenance to keep your products fresh and safe at their destination.

Why should you choose insulated containers?

Whether food, medical products or sensitive goods – our insulated containers ensure reliable temperature maintenance to keep your products fresh and safe at their destination. With high-quality materials and sophisticated design, we combine excellent protection with easy handling and sustainable reusability.

Why should you choose a thermocontainer?

Made of resistant EPS and robustly constructed, the thermo container offers high stability and is particularly suitable for the storage and transportation of medical products or perishable goods. Thanks to the flexible sizes and individual adaptations, the Thermocontainer can be tailored to specific requirements.

What types of containers are used for transporting temperature-sensitive goods?

There are two primary types of containers used for transporting temperature-sensitive goods: Active Containers: These are powered containers with built-in refrigeration units, typically used for long-distance or international shipments. Active containers are subject to stringent GDP and IATA regulations, requiring certification and validation.
