# Wellington air energy storage project launched

## Overview

---

What is the Wellington Battery energy storage system?

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an important role in the future electricity system. Construction of the project will be undertaken by AMPYR's preferred construction contractors Fluence and RJE Global.

What makes our Wellington storage facility special?

Our Wellington storage facility is extra special as it has multiple access points to the storage units and undercover loading areas to protect you from the Wellington weather.

What's going on with ampyr's Wellington Battery Project?

Ampyr said it has also signed a 10-year virtual battery offtake agreement with Adelaide-headquartered renewable energy gen-tailer Zen Energy for 150 MW of the stage one project's capacity. The company said more offtake arrangements are expected to be added to the initial phase of the Wellington battery, and for the second stage of the project.

Who is delivering the Wellington Stage 1 Bess project?

The project will be delivered by United States-based Fluence Energy, using its Gridstack energy storage product. Fluence has also entered into a 20-year operational service contract to service and maintain the Wellington Stage 1 BESS, with revenues to be optimised by the company's Mosaic and Nispera software platforms.
