

**EQACC SOLAR**

# **Western European Vanadium Battery Energy Storage**

## Overview

---

What is Europe's largest vanadium redox flow battery?

Europe's largest vanadium redox flow battery at the Fraunhofer Institute for Chemical Technology (ICT) in Pfinztal, Germany, entered controlled test operation and successfully demonstrated the on-demand integration of wind and solar power into the electrical grid.

What is the largest energy storage plant based on vanadium flow batteries?

The battery installation, which received funding from the SOLBAL photovoltaic investment aid programme, managed by IDAE, has a power of 1.1 MW and a storage capacity of 5.5 MWh, making it the largest energy storage plant based on vanadium flow batteries in Europe.

What is a vanadium ion battery?

With the aim to address these challenges, we herein present the vanadium ion battery (VIB), an advanced energy storage technology tailored to meet the stringent demands of large-scale ESS applications. The VIB is based on an advanced electrochemical framework integrating all-vanadium chemistry with a streamlined cell architecture.

What is a vanadium flow battery?

"Vanadium flow batteries store electricity electrochemically, like lithium batteries, but using a different configuration and elements different from lithium, in this case vanadium," explain experts from Endesa's renewable subsidiary, Enel Green Power Spain, from the Innovation area.
