

What are the new energy stations in Jerusalem

Overview

Will Dalia energy build a new power plant in Israel?

Dalia Energy has announced plans to build a new power plant in Ashdod, Israel. The project will cost 5.3 billion shekels (\$1.5 billion) and is being financed by Bank Hapoalim. The plant, called “Avshal,” will be constructed on the site of the current Eshkol power station. It will have a capacity of 850 megawatts.

What is a solar thermal power station in the Negev desert?

The Ashalim Solar Thermal Power Station in the Negev Desert combines photovoltaic and concentrated solar power technologies. It has an installed capacity of approximately 121 megawatts, contributing to Israel's solar energy goals.

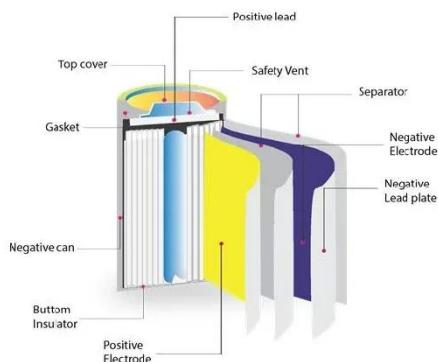

Should Israel continue using the reading power plant in Tel Aviv?

A few weeks ago, Energy Minister Israel Katz set up a committee to investigate how best to continue using the iconic Reading power plant in Tel Aviv. Earlier this month, the Environmental Protection Ministry warned that Israel is far from achieving its goals to cut global warming emissions and increase renewable energy.

Where will a gas-fired power station be built?

Running behind on its program for renewable energy, the government on Sunday approved plans for two gas-fired power stations — Kesem, to be constructed from scratch near Rosh Ha'ayin and Kafr Qasim in the center of the country, and the expansion of Dorad in the southern coastal city of Ashkelon.
