What are the signal base station sites in the Democratic Republic of Congo

Overview

Is the Democratic Republic of the Congo lagging behind in telecommunications?

Compared to the United States, the Democratic Republic of the Congo is massively lagging behind in the development of telecommunications. Under the country code +243, there were a total of 49.86 million connections in 2023. Among them were 49.80 million mobile phones, which corresponds to an average of 0.49 per person.

How can the DRC bridge the digital divide?

Deploying and operating networks, particularly in deep rural areas, continues to be a significant challenge in the DRC. To bridge the digital divide and expand network coverage in underserved communities, the companies have pledged to jointly construct up to 2,000 new solar-powered base stations over six years, using 2G and 4G technologies.

Why should you choose Vodacom Congo?

Thanks to its policy of corporate social responsibility, Vodacom Congo gives its subscribers access to solutions that contribute to the social and financial inclusion of the Congolese people. For more than 21 years, Vodacom Congo has been a privileged and constant partner in the economic and social development of the DRC.

How many people in the Congo have broadband?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. The Democratic Republic of the Congo is lagging behind in the expansion of broadband internet connections. Around 31 percent of all residents have access to the internet.
