

# What does the uninterruptible power supply battery cabinet include

## Overview

---

What does a battery cabinet power?

Battery cabinets are designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet.

What are battery and uninterruptible power supply (UPS) rooms?

Battery and uninterruptible power supply (UPS) rooms play a crucial role in ensuring continuous power supply and backup in various industries and facilities. However, managing these rooms can pose several challenges that need to be addressed for optimal performance and efficiency.

Why should you implement a battery and uninterruptible power supply room?

These trends will result in more reliable and efficient power backup systems, ensuring uninterrupted power supply for critical applications. Implementing a battery and uninterruptible power supply (UPS) room can provide an efficient and reliable power backup solution for businesses and organizations.

What is the battery capacity of the UPS system?

The UPS system uses batteries in the battery cabinet to provide power during disruptions. The battery capacity is 34.6 kWh. The system is lithium-ion based and can support up to 5 MW in parallel.
