# What generators are used in Luxembourg power station

## Overview

---

How many power plants are in Luxembourg?

Luxembourg has 2 utility-scale power plants in operation, with a total capacity of 1681.0 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

What are the different types of energy transformation in Luxembourg?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Luxembourg for 2022. Another important form of transformation is the generation of electricity.

What transformations are taking place in Luxembourg in 2022?

No data for Luxembourg for 2022. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions - during which up to half of their energy content is lost.
