

**EQACC SOLAR**

# What is the price of industrial energy storage batteries

## Overview

---

How much does a commercial battery energy storage system cost?

**Average Installed Cost per kWh in 2025** In today's market, the installed cost of a commercial lithium battery energy storage system — including the battery pack, Battery Management System (BMS), Power Conversion System (PCS), and installation — typically ranges from: \$280 to \$580 per kWh for small to medium-sized commercial projects.

How much does energy storage cost?

Energy storage system costs for four-hour duration systems exceed \$300/kWh for the first time since 2017. Rising raw material prices, particularly for lithium and nickel, contribute to increased energy storage costs. Fixed operation and maintenance costs for battery systems are estimated at 2.5% of capital costs.

How much does a lithium ion battery cost?

The average price of lithium-ion battery packs is \$152/kWh, reflecting a 7% increase since 2021. Energy storage system costs for four-hour duration systems exceed \$300/kWh for the first time since 2017. Rising raw material prices, particularly for lithium and nickel, contribute to increased energy storage costs.

Should you invest in a commercial battery energy storage system in 2025?

In 2025, investing in a high-quality ESS is not only affordable but essential for energy-forward businesses. Contact GSL Energy today to find the right storage solution for your business. Discover the true cost of commercial battery energy storage systems (ESS) in 2025.
