# What is the standard for solar container lithium battery energy storage cabinets

Support Customized Product

## Overview

---

Do battery energy storage systems look like containers?

C. Container transportation Even though Battery Energy Storage Systems look like containers, they might not be shipped as is, as the logistics company procedures are constraining and heavily standardized. BESS from selection to commissioning: best practices<sup>38</sup> Firstly, ensure that your Battery Energy Storage System dimensions are standard.

Does SCU have a lithium battery energy storage system container certification?

Recently, SCU successfully obtained the UN3536 certification for lithium battery energy storage system container.

What is a containerized lithium battery energy storage system?

SCU's containerized lithium battery energy storage system adopts a modular design, with the characteristics of high energy density and high efficiency. It can be widely used in various scenarios such as industrial and commercial energy storage, renewable energy grid connection, microgrid and off-grid power systems.

What is a lithium battery pack?

UN3536 specifically refers to large lithium-ion battery packs for energy storage systems. Such battery packs are usually used for grid energy storage, backup power supplies, large renewable energy systems, etc. The purpose of lithium battery packs is to provide external power to cargo transport unit components.
