# What kind of generator does Cape Town power station use

## Overview

---

Does Cape Town have power generators?

The City of Cape Town's (CoCT's) Facilities Management Department says it has installed power generators at a number of facilities over the last few months as South Africa's power crisis continues to deepen.

What is the power system in Cape Town?

Cape Town's power system is made up of a grid that distributes electricity across the city. Electricity is crucial to the functioning of Cape Town, powering homes, businesses, and infrastructure. The sources of electricity in Cape Town include coal, natural gas, and renewable energy options.

What type of energy does Cape Town use?

Cape Town relies on a mix of energy sources for its electricity generation. The city's power plants use coal, natural gas, and renewable energy sources such as wind and solar power. Coal is the most significant source of electricity in Cape Town, accounting for a significant portion of the city's energy mix.

What is the most important source of electricity in Cape Town?

Coal is the most significant source of electricity in Cape Town, accounting for a significant portion of the city's energy mix. However, there is a growing emphasis on diversifying the energy sources and increasing the share of renewable energy in the city's power generation.
