Where to install solar panels

Overview

Where should I put my solar panels?

The place you install your solar panels matters. Here are the most common places to put your panels, and areas to avoid. Rooftops are the most common places you'll see solar panels, but you have other options too. Installing solar panels can be a great leap toward electricity cost savings and energy efficiency.

How do I choose a solar panel placement?

Each factor will vary from home to home, which is why recommendations for placement will vary. Sunlight exposure – The job of a solar panel is to absorb sunlight. So, the primary consideration for panel placement is how much direct sunlight the location will receive throughout the day.

Where do solar panels go?

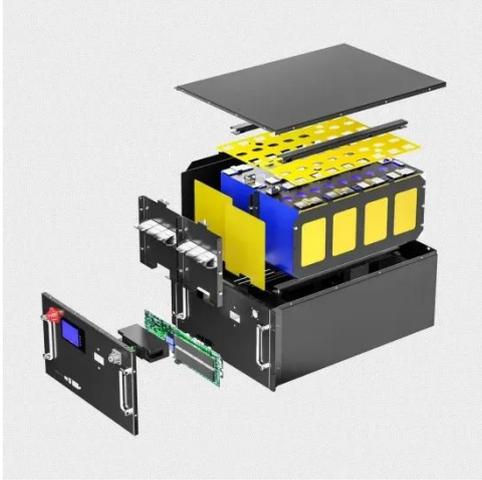

Rooftops are the most common places you'll see solar panels, but you have other options too. Installing solar panels can be a great leap toward electricity cost savings and energy efficiency. But the road to making it happen can be long and tricky. One problem you'll likely encounter: Just where will these panels go?

.

Where should solar panels be installed in the UK?

South-east and south-west facing roofs can also be suitable locations for solar panels, usually generating at least 80% of the energy a south-facing system would produce. Not a bad return. When it comes to roof pitch, the optimal angle for solar panels in the UK falls between 30 and 40 degrees.
