Overview

Will Cape Town stop approving off-grid inverters for solar backup systems?

The City of Cape Town will stop approving off-grid inverters for use in solar backup systems to curb faulty and dangerous installations of these inverters in households that remain connected to the grid.

Does Cape Town need a solar inverter?

From 1 October 2023, Cape Town will require that new applications for solar PV and battery systems connected to a building's wiring use a city-approved inverter and obtain professional clearance. It will also refuse applications for standby and off-grid systems.

Are Cape inverters compliant?

A certificate of compliance is issued upon installation. All products have warranties. Contact our team for any sales or technical enquiries. Secure Payment options available. Cape Inverters are known as trusted experts in installing reliable, compliant inverters and solar backup systems to keep the power on during load shedding.

How do solar and inverter battery backup systems work?

The sun or power from the grid recharges the batteries via the inverter when there is no load shedding. We deliver and install your solar and inverter battery backup systems within the Cape Town & surrounding areas. A certificate of compliance is issued upon installation. All products have warranties.
