Overview

How is the Middle East battery market segmented?

The Middle East battery market is segmented by type, technology, application, and geography. By type, the market is segmented into primary and secondary batteries. By technology, the market is segmented into lead-acid batteries, lithium-ion batteries, and other technologies.

Are flow batteries better than traditional lithium-ion batteries?

Flow batteries, which store energy in liquid electrolytes housed in separate tanks, offer several advantages over traditional lithium-ion batteries.

How do flow batteries work?

Flow batteries store energy in liquid electrolytes held in external tanks. Electrolytes pumped into a battery cell convert chemical energy into electricity. These batteries can be repeatedly recharged and discharged with minimal capacity loss and reduce fire risks compared to other types of batteries.

What is the forecast for the Middle East battery market?

During the time frame of the forecast, the Middle East battery market is expected to grow at a CAGR of more than 3%. The market was negatively impacted by the outbreak of COVID-19 due to regional lockdowns, leading to a decrease in demand for batteries. Currently, the market has rebounded from pre-pandemic levels.
