# **Which uninterruptible power supply is the best in Cuba**

## Overview

---

What type of power outlet does Cuba use?

Cuba uses both Type A/B and Type C power outlets. Some hotels will use one type and others another, although plenty use both, sometimes even in the same room! As a result, you'll have to pack the proper adapter to recharge your devices while on the road.

What type of power plug is used in Cuba?

In Cuba, power plugs and sockets (outlets) of type A, type B, type C and type L are used. The standard voltage is 110 / 220 V at a frequency of 60 Hz. Cuba, a Caribbean island nation, is known for its vibrant culture, stunning beaches, and fascinating history.

Do I need a power adapter in Cuba?

If you are visiting Cuba from the United States, you should bring a power adapter because US Type A or B outlets may not be readily available. If your device runs on 110 volts or is dual voltage, and the plug fits in a Cuban power outlet, it will work without a plug adapter in Cuba.

What is the electricity and power supply like in Cuba?

What's the electricity and power supply like in Cuba?

Although Cuba officially runs on 110V, many of the more modern hotels have 110/220V (dual voltage) outlets to cater to the lucrative European market. However, it's often difficult to determine what the voltage is, so always assume 110V unless it's explicitly stated otherwise.
