# Wholesale 300wh power station in Auckland

## Overview

---

What are the best portable power stations in New Zealand?

Grid Escape's ATB & Pecron Portable Power Stations range are designed to withstand New Zealand's harsh elements. These compact yet robust units are perfect for any scenario, whether exploring the great outdoors, powering through work at a remote construction site, or staying prepared during an unexpected power outage.

Which portable power station should I buy?

The ideal portable power station to buy depends on which devices you plan to use and how long you will travel without access to a recharging point. Our 1526Wh power station offers triple the power capacity of the 555Wh model, making it the best choice for people continuously on the road or whose camping trips last longer than the weekend.

What can you do with a power station?

You can take it wherever you go and use it to keep your mobile devices charged up. With this power station, you can power up laptops, tablets, drones, cameras, mini-fridges, e-bikes and even CPAP machines. Making it great for camping trips or out on adventures with family and friends.
