

EQACC SOLAR

Wholesale 37 5kva transformer in Israel

Overview

What is a 37.5kva transformer?

The 37.5kva transformer usually has a single-phase unit with two voltages, a 240x480V primary and 120/240V secondary. It is robustly constructed using high-grade materials like budding and cold-rolled silicon steel laminations. This equipment is also powered with innovative technology to ensure it'll serve its purpose safely and efficiently.

What is a 37.5 kVA transformer made of?

Most single-phase 37.5 KVA transformers are made of solid resin mass, sealed in silica sand. This coverage is to enclose and protect the coil. The winding materials used in this transformer are copper with a 600V and 120/240V primary and secondary voltage, respectively.

What is a Daelim 37.5 kVA single phase pad mounted transformer?

Daelim 37.5 kVA single phase pad mounted transformer operates safely, reliably, and efficiently and can be installed indoors and outdoors. This type of transformer has a low operating cost, is environmentally friendly, easy to install, and has a low purchase cost, so it is widely used in residential, commercial, and other public places.

How many LV bushings does a 37.5 kVA transformer have?

On the low voltage side, the 37.5 kVA single phase pad mount transformers feature three 1.2 kV, 630A LV bushings, each equipped with seven meticulously crafted holes, enhancing operational flexibility.
