

**Yerevan has an energy storage power station**

## Overview

---

Where is Yerevan 1 power station?

Yerevan 1 power station (Ереванская ТЭЦ-1) is an operating power station of at least 242-megawatts (MW) in Yerevan, Armenia. It is also known as Yerevan TPP. The map below shows the exact location of the power station. Loading map. Unit-level coordinates (WGS 84): CHP is an abbreviation for Combined Heat and Power.

Why did the output of the Yerevan power station decrease in 2023?

In 2023, the output at the Yerevan 1 power station decreased by 22%, while at the Yerevan 2 power station it increased by 50%. The reason lies in the obligations that the state undertook when it signed a contract with the shareholders of the station – the Italian company Renco and the German company Siemens – several years ago.

Why did Yerevan have a problem with public transport?

The problem was caused by the unprecedented growth of population in that period. In accordance with the new general plan of Yerevan worked out in 1962-1964, the Underground was seen as the most effective public transport means and it conformed to the concept of the city development.

How to get to Yerevan from the city center?

Though the city center of Yerevan can be explored even on foot, nevertheless we present you the main public modes of transportation in the city. The most popular public transport in Yerevan are the buses and minibuses. They have special destinations and stops. They are comfortable for the citizens and tourists. The cost of the route is 100 AMD.

## Yerevan has an energy storage power station
